Milling door

Hp = door leaf height (mm) - Lp = door leaf width (mm) - Lb = track length (mm) - Sp = door leaf thickness (mm)

❶ Per un'installazione a regola d'arte è necessario prevedere una battuta di fine corsa all' altezza della maniglia o almeno a terra. Tale battuta si rende tanto più necessaria quanto più alta e stretta è la porta. ❷ Für einen fachgerechten Einbau muss ein Endanschlag in Griffhöhe oder zumindest am Boden vorgesehen werden. Dieser Anschlag ist um so notwendiger, je höher und schmaler die Tür ist. ❸ For a perfect installation you need to place the end stop at the handle height or on the floor, at least. The taller and narrower the door is, the more necessary such an end stop is. ❹ Pour une installation dans les règles de l'art, il est nécessaire de prévoir une butée de fin de course à la hauteur de la poignée ou au moins au sol. Cette mesure est d'autant plus nécessaire que la porte est haute et étroite. ❺ Для идеальной установки вам необходимо разместить ограничитель на высоте ручки или, по крайней мере, на полу. Чем выше и уже дверь, тем более необходим такой ограничитель.
